

## 2021 NUC SALES INFORMATION

Chatsworth Honey and Eccles Apiaries have joined forces to provide you with healthy and vigorous 4 frame spring nucs! Our nucs are made to the specifications of the Ontario Bee Breeders' Association standards. All queens are daughters of carefully selected Chatty or Eccles breeder queens. Chatsworth Honey has been an active member of the Ontario Resistant Honey Bee Selection (ORHBS) program for over 30 years. Les of Eccles Apiaries headed the ORHBS program for 10 years while working with his wife Raquel Mijares González on their own breeding program.

Chatty and Eccles ORHBS stock is selected for gentleness, varroa mite tolerance, disease resistance and winter hardiness.

Each overwintered spring nuc consists of:

- 2 frames of brood and adhering bees
  - 1 frame of feed and adhering bees
  - 1 partially drawn frame for clustering/prevention of overheating
  - 1 marked 2020 summer mated Chatty or Eccles queen *plus...*
- a few extra shakes of bees to ensure a strong start to your hive.

Nucs are available mid May to July. Timing is weather dependent. Pick up at the Chatsworth Honey House only.

- 1- 9 nucs: \$220 ~includes a shipping box.
- 10 or more nucs: \$210 ~ includes a shipping box.
- 50% deposit required on all orders, by cheque or e-transfer
